HUYNH TINH THANH

Full-Stack Developer

Mobile: 0981773084
Email: tinhthanhit1995@gmail.com
Github: https://github.com/tinhthanh

PROFESSIONAL SUMMARY

- 5 Years working in Development (Angular/Spring).
- Strong knowledge and experience Front End, Back End Development using Java core .
- Knowledgeable on Software Engineering such as software design, construction and maintenance
- Experience scrape websites with Selenium and ChromeDriver/ FirefoxDriver
- Quick learning new technology and easy to adapt with under-pressure working environment.
- Able to work team-working and under high pressure
- Able to read and understand English document
- Experience in working with using remote data via REST APIs, JSON as well as integrating with third-party libraries
- Experience with Game Development using angular
- Migrate old project, angularJS, dotT.js to angular last version
- Developer chrome extension using angular/typescript
- Experience in deploy apps
- Experience in writing OOP (Procedure Oriented Programing) code
- Experience in real time web applications using websocket/firebase
    -

EDUCATION BACKGROUND

- **Bachelor of Software Engineering** Nong Lam

CERTIFICATES, HONORS AND AWARDS

- Passed B1 test at Nong Lam University
- Completed the 240 hours Global Software Tester training course of FPT Software
- Hibernate: Advanced Development Techniques

LANGUAGE SKILLS

- Vietnamese
- English

TECHNICAL SKILLS

- **Programming Languages**: Java, SQL, JavaScript, TypeScript, CSS, HTML
- **Frameworks/ Platforms/Lib**: Angular , angularjs, React Navive, Ionic,Spring, NestJS, Jenkins, SpringMVC, SpringBoot, Selenium, ionic framework, cordova, ORM jpa hibernate
- **Database Management Systems**: MySQL, MSSQL, ORACLE, firebase storage
- **IDEs**: Intellij, eclipse, netbean, Visual Studio Code, WebStorm, Sublime Text 3
- **Operating Systems**: Win 7, Win Vista, Win2K/XP, Win9x, Linux
- **Foreign Languages**: English (US)
- **Soft Skills**: Time Management

PROFESSIONAL EXPERIENCE

Jan. 2018 – May.2021: Exchange Betting
Senior Developer

- **Project Description**:
  - Exchange Betting is an online gambling company which operates the world's largest online betting exchange. It also offers a Sportsbook (fixed odds betting), online casino, online poker and online bingo

- **Responsibilities:**
  - At the same time, build new future and maintenance systems.
  - Examines the source code kit and is in charge of it.
  - Setting environment.
  - Meeting directly with customer, project leader.
  - Meeting weekly, report.
  - Write code base on detail design and
  - Function/Requirement specifications.
  - + Review code.
  - + Unit test.
  - + Write Q&A, show, find reason of problem, give the way to resolve.
  - + Support technical for
  - Migrate module using old technical, angularJS, dotT.js to angular last version
  - Java 8 – Migrate to java 11

- **Technologies:**

Huỳnh tính thành

- Angular; angularjs, dotJS, Jquery Javascript/Typescript; SCSS/SCC, MySQL, Stored Procedure, Spring MVC, Spring boot; ngx-charts, Git; Trello Websocket, stomjs sockjs, kibana

Apr. 2020 – Oct. 2020: Horse performance
Senior Developer

- **Project Description**:
  - Leverages new and existing technologies to provide premium horse racing information and race videos which are accessible anywhere and anytime.
  - Accessible 24/7
  - Provides proprietary horse racing information
  - Connect with our audience
  - Penetrate into new markets around the world
  - Bypass traditional channel to offer horse-racing information direct to our audience
- **Responsibilities:**
  - Using Selenium to scrape websites with ChromeDriver/ FirefoxDriver
  - Bypass Google ReCAPTCHA Images using third party
  - cleaning data and storing it in a database
  - Font End, config webpack to optimization minimize file bundler
  - Setting environment.
  - Meeting directly with customer, project leader.
  - Meeting weekly, report.
  - Write code base on detail design and
  - Function/Requirement specifications.
  - + Review code.
  - + Unit test.
  - + Write Q&A, show, find reason of problem, give the way to
  - resolve.
  - +Support technical for members.
  - +Testing for delivery

- **Technologies:**
  - Java Selenium ChromeDriver/ FirefoxDriver,Spring Boot, Angular; Typescript; SCSS; MySQL; ; ngx-charts, SVN, Redmine, kibana

Jan. 2021 – May.2021: Binary auto trade
Senior Developer

- **Project Description**:
  - Automated trading — also referred to as mechanical trading systems, algorithmic trading, automated trading or system trading — allow traders to establish specific rules for both trade entries and exits that
- **Responsibilities:**
  - Design and develop front end website and application.
  - Using Selenium to scrape websites with ChromeDriver/ FirefoxDriver
  - developer chrome extension open applications auto palce bet
  - angular folder structure modules, config webpack to optimization minimize file bundler
  - offer real-time solutions

- Function/Requirement specifications.
- Review code.
- Support technical for members.
- Testing for delivery

- **Technologies:**
  - Spring framework, PWA (Progressive Web Apps) Selenium, ionic framework, cordova typescript, firebase authentication firestore , firebase function,Git; Redmine;

May. 2021 – Now : K-Trade
Senior Developer

- **Project Description**:
  - A banking system module of customer and bank user using for manage inward & outward transactions.

- **Responsibilities:**
  - Develop application both server side and client side.
  - Design application methodology and define source code structure
  - Examines the source code kit and is in charge of it.
  - Setting environment.
  - Meeting weekly, report.
  - Write code base on detail design and
  - Function/Requirement specifications.
  - Define solution, tool support overhead process to optimize cost for project.
  - Review source code package and is responsible to package release.
  - Write Q&A, show, find reason of problem, give the way to resolve.
  - Support technical for
  - Planning, grooming & retrospective functions for each sprint

- **Technologies:**
  - Angular Javascript/Typescript; SCSS/SCC, ORACLE, Spring boot; jpa, mapstruct, Git; Websocket, stomjs sockjs
